

THE POST.

MIDDLEBURG..... NOVEMBER 10, 1870.

DAY AND NIGHT IN SWEDEN.—The peculiarities of day and night in Sweden strike the traveler very forcibly after being accustomed to the temperate zone. In June the sun goes down in Stockholm a little before ten o'clock. There is a great illumination all night, as the sun passes round the earth to the north pole, and the reflection of its rays is such that you can see to read at midnight without any artificial light. There is a mountain at the head of Bothnia, where on the 21st of June, the sun does not appear to go down at all. A steamer goes up from Stockholm for the purpose of conveying those who are curious to witness the phenomenon. It occurs only one night. The sun reaches the horizon—you can see the whole face of it, and in five minutes more it begins to rise. At the North Cape, latitude seventy-two degrees, the sun does not go down for several weeks. In June it would be about twenty-five degrees above the horizon at midnight. In the winter the sun disappears, and is not seen for weeks; then it comes and remains for ten or fifteen minutes, after which it descends and finally does not set at all, but almost makes a circle around the heavens.

SCRAPING AND WASHING FRUIT TREES.—Perhaps October and November are the two best months in the year for scraping and washing fruit trees—apples and pears. The insects which live in the bark and crevices of the trees have by that time retired to their winter quarters, and can be easily destroyed. There is nothing equal as a "wash" with which to scrub the trees than a preparation of say one pound of whale-oil soap to a large bucket of water well dissolved. There is nothing more nauseous to insects than this. It will lay "cold" everything we have tried except the circlo—shot; however, care no more for the mixture, even though accompanied with sulphur, lime-water, and tobacco juice, than it it were a gingerly dose of pure spring water. Put rose bags, and the steel-steel grape-sabot, surrender to its power immediately. Every farmer and gardener ought to have a supply of this soap on hand for use whenever necessary. Apple and pear trees well scraped and then washed with this preparation will not only be freed from some of the chief insects preying upon foliage and fruit but will sensibly feel its invigorating effects. —*Germania Telegraph.*

BALD EAGLE HOTEL,
No. 116 North Third Street,
PHILADELPHIA.
JOHN CLYMER, Proprietor
January 13, 1870-71

NOTICE.—Whereas my wife MARY NADLE left my bed and board without my just cause or provocation on the 20th day of August, 1869, I do hereby give her full credit her on my account, as I shall pay no bills contracted by her after this date. JOHN B. NADLE.
Perry township, August 18, 1870.

THIRTY-FIVE CENTS

J. S. BURKHART,
Selinsgrove, Snyder Co., Penna

Keeps constantly on hand a large and well made assortment of Tin, Sheet-Iron ware, Stoves, &c., &c. He is Agent for the following named articles.

"THE MORNING GLORY."

Littlefield's Patent Improved Bass Burner

COAL STOVE.

In this pattern of THE MORNING GLORY, several new and important features have been embodied, which can only be seen to be admired. This new stove is made entirely of cast iron, so fitted as to be straight, but can be made with sheet-iron upper section when preferred by the purchaser. Its ornamental finish is dainty, making it a hand-some piece of furniture, far more so than any stove heretofore made.

Its internal construction, though resembling some of the former patterns of THE MORNING GLORY, is quite different, making it more durable, and far less difficult to be repaired. The castings are of the highest order, fully equalling the finest castings made with the house.

April 6—1870.

"THE BRIGHT SHEAF."

Anti-Dust Air Tight Cooking Stove,
with Extended Fire-Box
for Wood or Coal.

Patented May 10, 1865.

We take pleasure in offering our customers and the Trade, a New first-Class Flat-top, and would call particular attention to its very attractive and valuable improvements.

This Stove has been carefully tested for several months, and the results have proved it highly satisfactory, that several of our oldest and most experienced stove dealers prefer it as a safe far beyond our ability to supply this season.

Selling front freehand, giving full use of the heat.

An additional slide in the oven, so arranged as to give more room in the upper part of the oven a great convenience much needed.

The oven is nearly as wide at the top as the depth line, which only increases the size, but will be recognized as a great advantage in baking.

DOTY'S CLOTHES WASHER.
The best, cheapest, and most popular Washing Machine ever invented.

It is easy to operate, sitting or standing; takes but little room; injuries or damages; finishes its work in two to four Minutes; is durable and convenient; and the only Washing Machine known that is liked the better the longer it is used.

THE UNIVERSAL CLOTHES WRINGER.

THE GREAT FAMILY ECONOMIZER.

The terms of our Patent call for Machine to be a most excellent Washer.

When we reduce every invention for washing clothes to a principle they all amount to that of pressing and squeezing, and forcing the water through them, thus removing the dirt. Most Washing Machines do it by rubbing.

Our Patent call for Machine to be a most excellent Washer.

Leave Harrisburg for Reading, Portville, Tamaqua, Minersville, Ashford, Shamokin, Allentown, and Philadelphia at 12 m., 1:10 a.m., 2:30 and 4:10 p.m.; stopping at Lehighport and principal way stations; the 4:10 p.m. train connecting for Philadelphia, Portville and Columbia only. For Portville, Schuylkill Haven and Auburn, via Schuylkill and Susquehanna Railroad, leaving Harrisburg at 3:40 p.m.

Great Trunk Line from the North and West for Philadelphia, New York, Reading, Pottsville, Tamaqua, Ashland, Shamokin, Lehman, Allentown, Easton, Emmaus, Lititz, Lancaster, Columbia, etc.
